

**AMENDMENTS IN THE CLAIMS:**

Please amend claims 46 and 50 as follows:

B  
C  
46. (Amended) A transflective display as claimed in claim 44, wherein the rear retarder comprises a rear quarterwave plate, and the rear quarterwave plate has a slow axis substantially parallel or normal to a bisetrix of surface alignment directions of the liquid crystal, such that a retardation of the rear quarterwave plate, in conjunction with the retardation of the liquid crystal and the front quarterwave plate, produces in a second state linear polarised light after a single pass.

C  
47  
50. (Amended) A transflective display as claimed in claim 44, wherein the rear retarder further comprises a rear halfwave plate and the rear halfwave plate is located between the rear quarterwave plate and the rear polariser.

Please cancel claims 25-37 without prejudice or disclaimer.

Attached hereto is an Appendix showing the above changes in annotated form.
